

Flexcon is happy to announce the release of our newest accessory, the Universal Base Extension (UNI EXT). Our new modularly designed base extensions can be used easily with all our well tank products, composite or steel, in all diameters. These unique base extensions are light, easily stackable for storage and transport, can be connected to adapt to any tank size, and provide an attractive alternative to cinderblocks or bricks. The modular design allows channels for air-flow below the tank.

We will be packaging our UNI EXT in boxes of 24 (UNI EXT BULK). Product is now available. Order some today!

3 Pieces for 16" Tanks

4 Pieces for 21" Tanks

5 Pieces for 24" & 26" Tanks
